CARDIOTHORACIC SURGERY

Perfusion Atomizer System

Perfusion Atomizer System is designed to improve vision of the surgical site. An irrigation mist gently clears blood from the site, improving vision without drying or desiccating delicate tissue.

Its atomizer offers advanced fluid and gas mixing technology to create a consistent, predictable blood clearing mist. The malleable shaft and the hand piece make it an excellent choice for facilitating a bloodless field.

Product code

GC1933A01

Ostial Perfusion Cannula

FEATURES:

- Intended to deliver solution directly to the coronary arteries
- Soft basket tip
- Different configurations
- Malleable stainless steel shaft

Product code	Description	Size
GC1240A10	90° curved soft basket tip	10FR
GC1240A12	90° curved soft basket tip	12FR
GC1240A14	90° curved soft basket tip	14FR
GC1240B10	135° curved soft basket tip	10FR
GC1240B12	135° curved soft basket tip	12FR
GC1240B14	135° curved soft basket tip	14FR

Sucker Intracardiac

FEATURES:

- Highly polished blood contact surfaces for patient safety
- Available with soft tip and rigid tip

Product code	Description
GC1221S01	Soft tip, pediatric
GC1222S01	Rigid tip, adult

Vein Cannula

FEATURES:

- Opaque structure
- I.D. 1.5mm blunt tip
- Rigid

Product code	Description
GC191003	White color, standard female connector

Vessel Cannula

FEATURES:

- Vessel cannula for delivery of cardioplegia solution to heart
- Available with one-way or free-flow valves in soft blunt tip styles
- Two tip sizes are available: I.D. 1.5mm or I.D. 1.0mm

Product code	Description
GC191001	I.D. 1.5mm
GC191005	I.D. 1.0mm
GC191002	I.D. 1.5mm, with one-way check valve

Thoracic Catheter

It is most suitable for post-operative drainage after cardiothoracic and thoracic surgery. Known for precise dimensions, perfect finish and durability.

The catheter has numerical depth marks at 2cm increments for easy and precise positioning and the beveled connector can be cropped to form an integral funnel connector.

Product code	Description
GC1919A10	10FR
GC1919A12	12FR
GC1919A14	14FR
GC1919A16	16FR
GC1919A18	18FR
GC1919A20	20FR
GC1919A22	22FR
GC1919A24	24FR

Product code	Description
GC1919A26	26FR
GC1919A28	28FR
GC1919A30	30FR
GC1919A32	32FR
GC1919A34	34FR
GC1919A36	36FR
GC1919A38	38FR
GC1919A40	40FR

Vacuum Wound Drainage System

Vacuum bottle is pre-evacuated reservoir with connecting tube for post-operative high vacuum wound drainage.

Product code	Description
GC1938A62	200ml, pre-vacuumed, with extension line
GC1938A64	400ml, pre-vacuumed, with extension line
GC1938A66	600ml, pre-vacuumed, with extension line

Redon Drain

FEATURES:

- Provided with radio-opaque line and smooth eyes
- Cross perforated length of tube: 14cm
- Markings on the tube at 19cm from the distal tip
- Soft, frosted & kink resistant PVC tubing

Product code	Description
GC1951A08	08FR
GC1951A10	10FR
GC1951A12	12FR
GC1951A14	14FR
GC1951A16	16FR

Protection Cap

FEATURES:

- Available in red, white and blue
- High-density PE
- Non-vented

Product code	Description
GC152901	Red
GC152902	Blue
GC152903	White

Three-way Stop Cock

FEATURES:

- Provide two additional ports for administration of any fluid
- Used to regulate the flow rate of fluids during clinical infusion

With Male Luer Slip

With Male Luer Lock

Product code

GC6031A01

Product code

GC6031B01

Graduated Bowls

GC MEDICA

Our durable plastic bowls are available in a variety of sizes with molded graduations.

FEATURES:

- Light blue with graduations in ounces and cubic centimeters
- Sterile bowls are packaged individually in easy-open peel pouches
- Clear/transparent bowl is available as well

Product code	Description
GC1972A01	Sterile 32-oz. Bowl
GC1972A02	Sterile 16-oz. Bowl
